

A panel integrating 24 passive PoE injectors into a single 19" / 1U panel to power up to 24 devices. Professional solution for remote power supply of multiple active elements with passive PoE support.

Technical parameters

Type of product: PoE injector

Connectors and Interfaces

Ethernet speed [Mbps]: 10/100

Physical characteristics

Rackmount: Yes
 Shielding: Yes
 Operating temperature [°C]: 0 up to 40
 Weight [kg]: 0,7
 Depth [mm]: 25
 Width [mm]: 483
 Height [mm]: 45

Power

LED indication: Yes
 Pin powering: 4,5 (+), 7,8 (-)
 The input voltage [V]: 12 .. 57V
 PoE Out ports: Dc24

Important Features

- 19" rackmount design
- 24 ports with passive PoE support
- LED for detecting the functional AC adapter
- Earthing screw at the back of the panel
- Protection against overvoltage (OCP protection 650mA) on each port
- Input power connector - standard 2.1 / 5.5mm Jack
